		Claims	NONE	NO

#### 2. citations and explanations (Rule 70.7)

Claims 1-55 meet the criteria set out in PCT Article \$5(2)-(4), because the prior art, not disqualified by date, does not by itself teach or fairly suggest the subject matter contained in claims 1, 15, 27, 39, 48 and 52. Claim 1 includes the subject matter of transmitting a cellular broadcasting service consisting of a substantially continuous stream of mostly different content, at least some interactive display messages for streaming display on art least one enabled personal cellular telecommunications devices where each interactive display message enables a subscriber to automatically activate a point-to-point message and actuable by a dedicated response means associated therewith. Claim 15 includes the subject matter of temporarily storing display messages in a dynamic storage buffer ready for display on the display screen; instead of displaying an idle screen on the display screen, automatically streaming display messages from the dynamic storage buffer on the display screen but interrupting their display to display a non-idle activity specific screen, if invoked; and automatically discarding display messages from the dynamic storage buffer in accordance with a display message discard scheme irrespective of their having been displayed on the display screen or not. Claim 27 includes the subject matter of temporarily storing display messages in a dynamic storage buffer ready for display on the second portion of the display screen; normally displaying an idle screen on the first portion of the display screen; and automatically streaming display messages from the dynamic storage buffer on the second portion of the display screen; provisioning on the subscriber interface a dedicated response means selectively actuable by the subscriber for actuating a response mechanism integrally formed with a display message; displaying a non-idle activity specific screen on at least the first portion of the display screen, if invoked; and automatically discarding display messages from the dynamic storage buffer in accordance with a display message discard scheme irrespective of their having been displayed on the display screen or not. Claim 39 includes the subject matter of temporarily storing display messages in a dynamic storage buffer ready for display on the second portion of the display screen; permanently streaming display messages from the dynamic storage (Continued on Supplemental Sheet.)

### V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued):

buffer on at least one portion of the display screen; and automatically discarding display messages from the dynamic storage buffer in accordance with a display message discard scheme irrespective of their having been displayed on the display screen or not. Claim 48 includes the subject matter of a display message for display on the display screen of a personal cellular telecommunications device, the display message comprising at least two integrally formed point-to-point transmission response mechanisms from the list of: a voice call; an SMS; a data session; email; and a facsimile transmission, and each having a dedicated response means associated therewith whereby a subscriber is capable of automatically activating one of the at least two point-to-point transmission response mechanisms. Claim 52 includes the subject matter of a method for operating a personal cellular telecommunications device including a subscriber interface having a display screen, a method for advertising the purchase price of an item, the method comprising the step of: displaying a staggered sequence of display messages on the display screen advertising the item in progressively smaller geographical areas centered around a predefined location.

(54) Title: METHOD FOR OPERATING A CELLULAR TELECOMMUNICATIONS NETWORK. AND METHOD FOR OPERATING A PERSONAL CELLULAR TELECOMMUNICATIONS DEVICE

(57) Abstract: For use in a cellular telecommunications network (1) including a plurality of individually addressable Base Transceiver Stations (BTSs) (2) providing bidirectional signal coverage over a predefined geographical area, capable of transmitting Point-To-Point (PTMP) messages over a Point-To-Point Service (PTP) Service (PTMPS) functionality, and capable of transmitting Point-To-Point (PTP) messages, streaming of a substantially continuous stream of mostly different content, at least some interactive display messages on at least one personal cellular telecommunications device (3) prior to their automatic discarding irrespective of their having been displayed or not.

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued): buffer on at least one portion of the display screen; and automatically discarding display messages from the dynamic storage buffer in accordance with a display message discard scheme irrespective of their having been displayed on the display screen or not. Claim 48 includes the subject matter of a display message for display on the display screen of a personal cellular telecommunications device, the display message comprising at least two integrally formed point-to-point transmission response mechanisms from the list of: a voice call; an SMS; a data session; email; and a facsimile transmission, and each having a dedicated response means associated therewith whereby a subscriber is capable of automatically activating one of the at least two point-to-point transmission response mechanisms. Claim 52 includes the subject matter of a method for operating a personal cellular telecommunications device including a subscriber interface having a display screen, a method for advertising the purchase price of an item, the method comprising the step of: displaying a staggered sequence of display messages on the display screen advertising the item in progressively smaller geographical areas centered around a predefined location.
